Summer Math Assignments Entering Grades 1-8 2024-2025

The purpose of summer math work is not to push in to new territory, but to keep the mind on logical principles and review fundamentals. All students should complete a Summer Skills math workbook for the grade that was most recently completed. Some students may have already completed the listed book last year. That is perfectly fine, and will still accomplish the goal of the summer work. Work should be spread out over the summer (3 to 4 times per week throughout the summer). Parents should remove the answer section from the back before giving the book to their student.
